

Dear Friends of the Revival of Afghan Music and Music Education in Afghanistan,

Many of you as contributors to our project for the rebuilding of music education in Afghanistan are aware that we are progressing well and right now we are establishing the first and the only college of music in that country. While we are waiting for the completion of construction works and the arrival of musical instruments, scores and other essentials, it is time to begin recruiting specialist music teachers from abroad for some musical instruments.

Given your support and contribution to the rebuilding of music education in Afghanistan, I approach you to see whether it is possible to place on the web-site of the organisations and music institutions that you are associated with or you represent a link to our job announcements for music teachers. Below are given the links for these announcements, where the TORs for the required music teachers are placed.
